Stop the bombings in the PH!

People's resistance

- Supposed aim (directed by US) is wiping out the armed revolution
- History has proven: as long as there is inequality and as long as the root causes of the problems of the Filipino people are not addressed, all forms of resistance will continue.
- As the Filipino people continue to resist these attacks in all fronts, there is an urgent need for the global Friends to expose, condemn and oppose intensifying US aggression in the Philippines and state terrorism by the US-Marcos government.

Our calls

- Call for an immediate end to the bombings by the US-Marcos regime.
- Demand a stop to all arms sales and military aid to the US-Marcos Government.
- Demand an end to US aggression in the Philippines, including the withdrawal of all US military forces.
- Demand that the US-Marcos government seriously heeds the people's call for genuine solutions to the root causes of the socioeconomic problems of the Philippines, instead of using public funds on war efforts against the Filipino people.

International support

“Direct US intervention is increasing and the threat of US aggression is ever present. Those who extend support to the Philippine revolution are true friends of the Filipino people. We are grateful for such support and we receive it in order to further strengthen the revolutionary movement and fight more vigorously than ever before for the national and democratic rights of the people.” - NDF 12 Point Program
